Supply Chain Improvement Programme

Strengthen your supply chain

COVID-19 and the EU exit mean it's a turbulent time for Stoke-on-Trent & Staffordshire SMEs. Whether customer demand has lessened or suppliers can no longer satisfy orders, external forces are having an unprecedented impact on supply chains.

Fortunately, our Supply Chain Improvement Programme can help to get your manufacturing business back on track. Our experts will use their insight to help you take control of your supply chain, as well as mitigate risks and take advantage of the opportunities presented to you.

HOW CAN WE HELP?

Our blended-learning programme means you'll benefi t from both workshops and one-to-one adviser support. The latter includes a supply chain audit, where an adviser will analyse the risks your business is exposed to and create a handy report detailing how you can strengthen your supply chain. Moving forward, our support will provide you with a holistic view of your supply chain, helping you to spot issues and increase efficiency and performance.

HERE ARE JUST A FEW OF THE BENEFITS...

- Faster growth
- Increased business value
- Better collaboration with suppliers
- Improved sustainability
- The chance to address demand uncertainty
- Boosted customer centricity
